Time traveler claiming to be from the year 2045 delivers alarming predictions for the next four years

- **MORE:** [Strange detail in 1977 Elvis concert photo fuels wild time-travel theories](#)

A man claiming to be a time traveler from the year 2045 says the world will gain definitive proof that aliens exist, cash will be extinct and the US will no longer be a country within the next four years.

Calling himself Adam Archon, the mysterious man claimed the technology to travel in time will become publicly accessible in 2028, the same year he said extraterrestrials land on Earth and end decades of secrecy by governments worldwide.

Archon, who claimed he was born on December 6, 2019, without any proof, recorded his supposed knowledge of the future during a March 2019 video which recently resurfaced online amid the public release of classified **UFO** files by the **Pentagon**.

'Take cover now' warning issued as tornadoes close in on the North...
after the ad

While allegedly connected to an active lie detector machine, Archon said: 'Yes, it is true that aliens did land on Earth in August 2028. In fact, we have known of the existence of aliens before 2028, but it isn't until 2028 that it becomes public knowledge.'

Archon, whose face was blurred and voice altered during the interview with the **YouTube** channel Apex TV, said he had traveled back to a time before he was born to experience history in-person, which he claimed was a common practice in the future.

'Time travel was released to the public in 2028, but it was invented in 1981. It was just kept secret until they released it publicly,' he claimed.

Moreover, Archon claimed that most UFO sightings today were actually the craft used by time travelers from the future to go back in time to visit historical events.

According to the ten-minute interview, which has been viewed more than 1.3 million times, Archon was telling the truth, with Apex TV claiming every answer registered as truthful on the lie detector test.

Archon also mentioned the public will start getting an implanted chip called 'The One' in their right hand in February 2029.

The device allegedly lets users pay for items, boosts brain function and improves health. This system will supposedly replace all global currencies, making cash extinct.

This technology has existed for the last decade, with people having the ability to get a small microchip implanted in their hand so they can pay for things such as coffee or groceries just by waving their hand near a scanner typically used for credit cards.

According to the self-proclaimed time traveler, who did not show any physical proof he was from the future in his interview, this new system of digital money would debut right before the third chilling world event - the end of the US government.

Archon claimed that in 2030, the US would no longer be an independent nation and would instead become part of a new world government that splits up the globe by continent - with the US becoming part of 'District 3.'

The new world order, he said, was also said to be run by an AI program named The Light that will be released in 2033.

Archon claimed it was built into every electronic device, allowing anyone to talk to it and ask it anything. However, a group of ten government officials monitored all of The Light's decisions to make sure it was ruling ethically.

By 2045, Archon said scientists developed the technology to clone dinosaurs, creating a real-life 'Jurassic Park' where the public can visit prehistoric creatures.

'You can see T-rexes, Triceratops, velociraptors. If they existed, you can see them. People can go and visit things in the past, like to go visit the dinosaurs or major world events.'

Skeptics have claimed that Archon's January 2019 video was 'rehearsed' and fake, noting the time difference in the supposed three-minute speech

A self-proclaimed time traveler from 2045 has claimed that scientists developed the ability to clone and recreate dinosaurs (artist's impression)

While [the March 25, 2019, video](#) claimed that Archon was telling the truth, multiple pieces of his story did not add up and would be impossible under US laws.

In a separate video posted in January 2019, Archon started by claiming that there would be a documented increase in the number of UFO sightings worldwide that same year. While that did actually happen, his information about 2020 was

Read More

EXCLUSIVE The day every
affair will be exposed:
Experts reveal what
cheaters must do
immediately

way off.

'In 2020, there will be a robot released to the public that causes a lot of controversy,' he **said in the three-minute video** that did not involve a lie detector.

There has been no clear evidence that a robot was released that caused major controversy in the US or worldwide.

Archon also failed to mention anything about the coming Covid-19 pandemic or anything for the following seven years.

Viewers of his January video claimed that Archon's statement was suspicious since the clock seen next to him showed nearly 15 minutes of real time passing despite the clip only being three minutes long.

One skeptic said: 'Does anyone else see that the video is 3:36 minutes long but the clock in the back moves a good 15 minutes? That means this was rehearsed and they had to cut out the mistakes.'

Meanwhile, Archon's shocking claim about the final president in US history would seem to be completely implausible.

'Yolanda Renee King does become, and she is in fact noted as the greatest president of the United States, yes I can confirm,' Archon claimed while taking the lie detector test.

King, 18, is the only grandchild of Martin Luther King Jr and is already known for being an author and activist, specifically against gun violence.

However, Archon's timeline with King becoming president could not come true if the US were no longer an independent nation by 2030.

King will turn 35 years old in 2043, the age at which an American citizen can legally run for office under current US law. The next presidential election would not be until 2044.

How would our lives change if aliens revealed themselves and cash disappeared within four years?

What's your view?

Scientists have stated that time travel into the past is not only possible; the math to make it happen actually aligns with Einstein's famed theory of general relativity - which says that space and time are linked together as 'spacetime,' and gravity is the result of massive objects like planets and stars curving this spacetime.

Despite the theory of time travel appearing to be plausible, there has been no concrete evidence that humans can regularly move backward through time, or have a craft capable of doing that.

Meanwhile, the US government has repeatedly stated that no physical proof of extraterrestrials or UFOs has ever been presented.

Archon had claimed in the video that the aliens who make contact with humans in

2028 'do not come from space.'

'I cannot elaborate on where they come from because of the possibility of a paradox,' he alleged.

I guess the time traveler from 2045 got jealous of the one from 2118 stealing his thunder. But these bozos can't even keep their timelines straight. Really, Daily Mail, you're becoming the National Enquirer.
